

## Subject Line: Want to Beat the Volatile Market? This Is How. . .

Dear Investor,

Investment experts are saying 2023 could be a rough year for the stock market.

This is nearly the same headline Barron's posted on their site on January 18, 2022 - and their projection was right.

But despite a rough 2022 market, this didn't stop a 28-year investor from achieving big gains of 48%, 52%, 98%, and 107% – in just two weeks!

But these big gains didn't come trading penny stocks, puts, calls, complex spreads – or even risky options.

And he didn't do it *guessing* the direction of the market.

No, he's made these big gains with a new (and proven mathematical) approach he calls "strategic investing."

The best part is that. . .not only does his strategy work regardless of the direction the market moves. . .

But the biggest gains are when the market is volatile.

[Even if you've never heard of him, it's worth seeing here.](#)

Roger Scott is a former CEO of two hedge funds. . . and has partnered with some of the most sought-after minds in the world like. . .

- Kevin Hasset – former Senior financial economist in the Presidential Administration of President Trump.
- Charles Calomiris – Professor of Finance at Columbia University. . Appears on CNBC and Fox News regularly. . . one of the top economists of the country. . . and the White House calls on him as a financial advisor.

Over the last five straight years he's generated an average return of 159% – on live signals!

With the Fed's latest action plan, he's gearing up for what could be the biggest windfall yet!

He talks about *exactly* what is strategy is. . .

What's currently going on in the market at this moment that's prompting him to prepare for a market shift.

And he'll even provide his #1 investment that he believes will dominate in the coming months.

I urge you to watch his free presentation – and the exact details of his strategy – while it's still available, right here.
