Was there A Gliche in Your Form?

This Opportunity Is Slipping Away.

You’re Missing Out On Profits. . .

Are You Going to Let This Opportunity Slip Away?

This Could be Your Last Chance.

Warning: This May be Your Last Opportunity

Dear (name),

You recently viewed my video presentation on my premium trading service called Alpha Rotation.

Thousands of others have already viewed this presentation as well. And many of them are already taking advantage of the current situation that I believe could be the biggest gains yet. (bigger than the 159% we’ve been averaging every year over the last 5 years).

In my presentation, I reveal everything you need to know to get in on sector clusters trading. But my records show your order details never came through.

I’m not certain whether this was a technical error, or if. You simply decided not to join. Either way, I believe you’re missing out on what may be the best strategic sector trading on the open market today.

Which means, right now, you’re missing out on a major sector rebalance that I spotted in the market that could grow your retirement wealth much bigger.

Thus, I don’t want you to miss out.

And with my [unique strategic investment](#), you have the chance to get in on what I believe to be some of the biggest gains yet.

Now's the time to complete your registration as so many have already and take advantage of this opportunity right here.

Remember, time is short because the sector shifts have already begun. Which means, the longer you wait, the less money you'll make.

You simply cannot wait any longer.
